

# Spore Vision Brief

## OUR MISSION

**SPORE (\$SPORE)** is the first memecoin explicitly designed to fund cutting-edge fungal science. It transforms the viral energy of crypto culture into direct support for ecological discovery, genomic research, and conservation.

We believe in a future where mycology is not underfunded and forgotten-but decentralized, supported by community action, and open to everyone.

## THE OPPORTUNITY

By supporting **\$SPORE**, donors become patrons of biodiversity, champions of open science, and collaborators in revealing the unknown fungal world.

This is more than giving. This is a chance to decentralize scientific power and spark discovery in ways that governments and conventional institutions no longer can.

## HOW TO PARTICIPATE

- Hold **\$SPORE** as a symbol of support
- Donate directly to the research fund at [DentingerLab.org/donations](https://DentingerLab.org/donations)
- Fund a genome, name a species, or support a fellowship

## JOIN US

The fungal kingdom is vast, underexplored, and critical to Earth's future. With **\$SPORE**, we can build a new model for scientific funding – one that is decentralized, ethical, and mycelially connected.
